

2024 UHC MAPD C-SNP Formulary

Chronic SNP members will continue to have an additional nineteen drugs down-tiered on the formulary offering for 2024. These drugs are targeted at cardiovascular disease and heart failure, two of the C-SNP qualifying conditions, to create great differentiation for C-SNP plans

- Unique to the C-SNP formulary, Chronic SNP members managing diabetes will continue to benefit from diabetic supplies on Tier 2 compared to Tier 3 on UHC's Core formulary.

2024 CSNP Formulary vs. 2024 MCORE

Generic Drug Name	Common Use	2024 C-SNP Tier	2024 MCORE Tier
Bisoprolol	Hypertension	1	2
Bisoprolol/HCTZ	Hypertension	1	2
Chlorthalidone	Hypertension/Edema	1	2
Digoxin	Heart Failure	1	2
Diltiazem	Hypertension	1	2
Eplerenone	Heart Failure/Hypertension	2	3
Felodipine ER	Hypertension	1	2
Fenofibrate	High Cholesterol	1	2
Fenofibrate Micronized	High Cholesterol	1	2
Fenofibric Acid DR	High Cholesterol	1	3
Gemfibrozil	High Cholesterol	1	2
Isosorbide Dinitrate	Angina	1	2
Nitroglycerin SL	Angina	1	2
Prasugrel	Antiplatelet	1	3
Ranolazine ER	Angina	2	3
Sotalol	Antiarrhythmic	1	2
Spironolactone/HCTZ	Heart Failure	1	2
Torsemide	Hypertension	1	2
Verapamil ER Tab	Hypertension	1	2

Notes: UHC MA formularies meet all CMS formulary requirements and include at least two drugs from each therapeutic category (i.e., cholesterol-lowering medications) except for those categories that don't include two or more drugs; as new generics are made available and added to the formulary, some brand drugs were removed – standard industry practice in order to allow access to similar drugs at a lower cost to the member
